

2006 IWTC DVDs Now Available

On June 2nd and 3rd, the 2006 International Whiplash Trauma Congress (IWTC) addressed a wide spectrum of issues associated with whiplash and other crash-related injuries. Presented by the Spinal Injury Foundation and co-sponsored by the Oregon Health and Science University School of Medicine's Center for Health Communities and Western States Chiropractic College, the event was held at the Oregon Convention Center in Portland, Oregon.

IWTC Attendees took advantage of cutting-edge presentations on whiplash trauma research, diagnosis, and treatment from a prestigious multidisciplinary faculty of speakers from medicine, chiropractic, engineering, biomechanics, neurophysiology, epidemiology, and other fields.

The proceedings of the 2006 International Whiplash Trauma Congress are now available on DVD. This video record of an important research conference will serve as a vital resource for any clinicians or researchers interested in keeping abreast of the latest developments in whiplash trauma.

The comprehensive set of eight DVDs includes all plenary and abstract presentations from the highly-successful two-day event. Cost for the complete set is \$199 - a remarkable value for 12 hours of continuing education. Don't miss this opportunity to add critical information to your library—and to your working knowledge—about whiplash and its sequelae.

To place your DVD order, please contact Cathy Crawford, Congress Secretariat, at 503-586-0127 or via email at cathy@forensictrauma.com. For information about the 2007 International Whiplash Trauma Congress, slated for October 26 and 27 at the Trump International Sonesta Beach Resort in Miami, Florida, please visit our website: www.spinalinjuryfoundation.org.

Sincerely,

Christopher J. Centeno, MD
